

Coming Soon Template

This template is a simple one page “Coming Soon” template that allows you to keep your users informed, till your website is ready.

Features:

- jQuery Countdown Script – a great plugin by [Keith Wood](#)
- Valid PHP e-mail subscription form
- Options panel
- XHTML 1.0 Transitional valid.
- CSS 3 valid.
- Multi-browser compatibility: Internet Explorer 8+, Firefox, Safari, Opera, Chrome

What you get in this package:

Name	Date modified	Type	Size
Bebas-fontfacekit	10/26/2011 4:25 PM	File folder	
images	11/11/2011 5:17 PM	File folder	
js	10/26/2011 3:55 PM	File folder	
styles	10/26/2011 12:47 ...	File folder	
emailform.php	10/19/2011 1:48 PM	PHP Script	2 KB
index.html	10/26/2011 4:03 PM	Chrome HTML Do...	6 KB

Bebas-fontfacekit folder: The folder contains all the necessary versions of the fonts, for all the browsers, to use with the new CSS3 command "@font-face", that allows you to use in your website also fonts that are not installed on the end-user computer.

images folder: The images folder contains all the images and icons used into the template.

js folder: The js folder contains all the javascript files used into the template.

styles folder:The styles folder contains the style.css file. This file handles all the styles of the template.

emailform.php file:It handles the functionality of the newsletter form of the template

index.html file:This is the main template file.

HTML Files

The template uses one html file named index.html. The file is separated in sections to help you identify the areas of the template to edit.

The Options Panel section should be removed before uploading the files to the server. It is there for presentation purposes only.

```

<!-- Options Panel -->
<div id="options" class="rounded">
  <h2>OPTIONS PANEL</h2>
  <div id="texture_options">
    <h3>Textures</h3>
    
    
    
    
    
    
  </div>
  <div id="color_options">
    <h3>Color Options</h3>
    <div id="color1" class="color"></div>
    <div id="color2" class="color"></div>
    <div id="color3" class="color"></div>
    <div id="color4" class="color"></div>
    <div id="color5" class="color"></div>
    <div id="color6" class="color"></div>
  </div>
</div>
<div id="options_button" class="rounded"></div>
<!-- end Options Panel -->

```

CSS Files

The template uses only one CSS file – style.css. The file is separated in sections using:

```

/*
  Countdown styles
*/

```

To edit a specific section of the template, find the section label in the css file and scroll until you find the style you want to edit.

After you made all the style changes, remove the Options Panel Style, since it won't be needed in the finalized website.

JavaScript Files

The js folder contains 2 files:

- jQuery CountDown Plugin
- custom.js

To customize the countdown script, open **custom.js** file and change the date like in the example below:

```
//countdown
```

Replace with your own date

```
$(function () {  
    var countDay = new Date();  
    countDay = new Date('December 25, 2012 00:01:00');  
    $('#defaultCountdown').countdown({until: countDay,  
    format: 'DHMS',  
    layout: '<div id="counter">'+
```

PHP Files

Open ***emailform.php*** file and locate the code from the image below. Replace email address, success message and the website name with your own.

```
<?php  
$email_to = "yourname@yourdomain.com"; // Replace this with your email address  
$success_message = "Thank you for contacting us. We will get in touch shortly."; // This is an example message. Replace with your own.  
$site_name = "Website Name"; // Replace this with your website name.
```
